Eric Sanchez

email: eric.q.sanchez@gmail.com • **mobile**: 718-825-5725 • **linkedin**: https://www.linkedin.com/in/ericsanchez87

Software Engineer with 5+ years experience specializing in developing and launching Web Applications using modern technologies like React, Next.js and Node. I have extensive experience working with large brands and consumer facing, revenue driving products with 1M+ monthly visits.

Proven leadership, cross-functional collaboration and complex problem-solving skills that facilitate a healthy and supportive team dynamic, accurate communication between stakeholders and development teams, and improved software release schedules through anticipating roadblocks and prioritizing features – resulting in impactful and timely releases.

Professional Experience

EVEN FINANCIAL • New York, NY – Remote • August 2021 to October 2022
The leading search, comparison, and recommendation engine for financial services.
Software Engineer
Contributor to Even's core financial search product.
- Plan, document and deliver fundamental services to the refactor of Even's search product, which includes: a service that ingests Figma style tokens and outputs base Styled Components & an API service abstracted around OpenAPI generated endpoints and a modular loan application flow that is scalable for alternative future implementations
- Integrate DataDog for error tracking and Unleash for AB testing and Feature Flagging into legacy search product, bringing visibility and control to long standing errors and enable quick fixes without redeploys
- **Key skills include:** TypeScript, React, Styled Components, CSS/SCSS, HTML, Redux, Jest, React Testing Library, OpenAPI, NX, Lighthouse SEO & performance optimization, CI/CD with Circle CI, code reviews

EQUINOX • New York, NY • May 2019 to August 2021
Branded as one of the top luxury gyms in the world – featuring world-class personal trainers, group fitness classes, and spas.
Software Engineer II
Responsible for planning, developing and releasing products & features related to Equinox's broadest reaching channels as well as premium offerings.
- Architected a Contentful driven re-design of equinox.com, allowing content editors to dynamically load select components, update metadata and copy throughout the site, which resulted in a significant reduction in developer engagement for common updates by empowering editors to make complex changes within safe boundaries
- Re-architect inherited Equinox+ streaming service repo to improve developer experience and scalability by cleaning up duplicative TypeScript types and functionality throughout live and on-demand video features, as well as normalizing API calls and response data
- **Key skills include:** Next.js, TypeScript, SEO, Contentful, HTML, CSS/SCSS, Analytics, AB testing, Feature Flagging, Shopify, GraphQL Apollo, MUX, Webpack, technical documentation, run daily standups, ticket grooming, mentoring jr. developers

DOM AND TOM • New York, NY • September 2017 to May 2019
A product agency that helps Fortune 500 companies and next generation startups build the future of digital.
Web Developer
Responsible for translating designs into crossbrowser, responsive, user interfaces for web applications, microsites and e-commerce platforms.
- **Key skills include:** HTML, CSS, React, Redux, Contentful, Shopify, SCSS, Bootstrap, and email HTML design implementation

Volunteer
